Data Evaluation Questionnaire — Business Operations (General)

IEC, Inc. · IEC MSO Data Network

Purpose: buyers price operational data from counts and descriptions only — volumes, history, systems, and workflows. Every answer is a number, a date range, a system name, or a yes/no. No personal or customer-identifying data of any kind is needed.

About data licensing — and what your data is worth

What "licensing your data" means. AI companies train their systems on real-world operational data — how work actually gets done: volumes, workflows, scheduling, documentation, billing patterns. They pay for the *right to use* that data. A license is not a sale: you keep full ownership, the license covers defined uses for a defined time, and the same data can be licensed to more than one buyer — so value can be earned repeatedly, not once.

Why your data has value. Buyers cannot manufacture this data — it only exists inside operating businesses like yours. Three things drive the price: volume (how many records/transactions your operation produces), history (how many years are stored in your systems), and standardization (the same workflows repeated across locations — multi-site operators on shared systems are exactly what buyers look for, because consistent data trains better models).

What it pays. The buyer program IEC is engaged with pays $100K–$2M per approved partnership, with the exact figure set by the buyer's evaluation of the counts in this questionnaire. Larger, longer-history, multi-location operations price at the top of the range. Your share of any license IEC closes on your data is 75% of the license value, paid when the buyer pays.

How the process works. (1) You answer this questionnaire — counts only. (2) You sign IEC's exclusive data licensing grant, which makes IEC your sole counterparty to buyers (no brokers, no marketplaces). (3) Buyers evaluate the counts and quote. (4) Any data that ever moves is de-identified first, inside your own systems, under expert certification — no names, no patient or customer identities. (5) You see the terms before anything is final, and nothing is licensed without the agreement you signed.

What we never ask for. This questionnaire asks for numbers, date ranges, and system names only — never patient records, customer lists, or personal information of any kind.

A. The business

1. Legal entities covered (list each) and what each does (one line):
2. Locations (city/state only):
3. Year each entity started:
4. Total employees (full-time / part-time):
5. Decision-maker for a data licensing agreement — name + title:

B. Systems

6. Core operating systems (name each): CRM ____ · Job/project system ____ · Accounting ____ · Email/docs [ ] Microsoft 365 [ ] Google Workspace · Phone/call system ____ · Other ____

7. Are records centralized in one system or spread across several? (describe briefly):

C. Volume & history (counts only)

8. Customers/clients served per year:
9. Jobs/orders/projects completed per year:
10. Years of history stored: from year ____ · customer records ____ years · job/project records ____ years · financial records ____ years
11. Call/email volume per month, if tracked (counts only):

D. Workflows & documentation

12. Do written SOPs exist for: [ ] sales/intake [ ] operations/delivery [ ] billing [ ] customer service [ ] staff training
13. Approximate number of staff trained on the same standard workflows:
14. Languages used with customers and in documentation (list all):

E. Scope & exclusions

15. Any data categories you would exclude (describe categories only):
16. Any existing agreements restricting licensing of your operational data? [ ] No [ ] Yes (describe):
17. Willing to sign an exclusive data licensing grant to IEC MSO for evaluation? [ ] Yes [ ] Not yet — questions first

Return: reply by email with the answers (in the email body is fine). Questions: Mohammed Morgan, MD — 857-867-1767.

IEC, Inc. — licensing only, never a sale. Your data stays in your systems; anything shared with a buyer is de-identified/aggregated first, under agreement.
